

For Immediate Release

Mustang Survival Launches New Ice Commander™ Rescue Suit PRO

October 18, 2007 – Victoria, BC – Mustang Survival today launched the Ice Commander™ Rescue Suit PRO at SARSCENE 2007 which brings together search and rescue experts from across Canada and around the world in Victoria, BC. Providing enhanced safety, comfort, mobility and ease of use the Ice Commander™ Rescue Suit PRO (IC9002) offers insulation and flotation performance allowing rescuers to be immersed in icy cold water for extended periods of time while maintaining mental and physical capabilities.

“Ice rescue professionals have extremely demanding jobs and organizations like the Coast Guard, Fire Departments and Ice Rescue Teams chose Mustang’s Ice Commander Rescue Suit to keep them safe,” said Frank Leffelaar, Marketing Services Manager for Mustang Survival. “Our engineers worked with trainers and customers to make enhancements to the new Ice Commander Rescue Suit PRO version to give them increased protection and the agility they need when facing the elements.”

According to Gerald Dworkin, Technical Consultant for Aquatic Safety and Water Rescue for Lifesaving Resources, “Mustang Survival has without a doubt developed the best ice rescue suit available. It is incredibly easy to don, gives rescuers a greater dexterity and a full range of motion, and protects them from the effects of hypothermia while performing a rescue.”

Key features of the Ice Commander™ Rescue Suit PRO:

- Faster donning as a result of a longer torso, diagonal zipper entry and widened boot entry.
- Adjustment straps on torso and legs for secure fit and increased mobility.
- New hood design with back zipper adjustment and mouth and nose protector offers a more secure fit and reduced risk of water entry.
- Back O-ring safety line attachment with front quick-release.
- Includes over-gloves to improve wear during rope handling and overall suit durability.
- Zip-in liner eases removal for drying and cleaning.
- Increased size range fitting heights of 4’11” to 6’7” and weights from 110 to 130 lbs.

The existing Ice Commander™ Rescue Suit (IC9001) was updated to include a new heavy duty zipper, ergonomic quick access ice awl pockets, widened boot entry for fast donning and optional over gloves for improved durability.
