

MUSTANG SURVIVAL SENTINEL™ SERIES

US NAVY AVIATION RESCUE SWIMMER DRY SUIT (MSD660) US AIR FORCE PARARESCUE - NON FIRE RETARDANT DRY SUIT (MSD660 AF)

The MSD660 is a specialized dry suit designed for US Navy Aviation Rescue Swimmers and adopted by USAF PJs. The suit is designed to aid in hypothermia protection during surface operations in or on the water when worn with insulating undergarments. The MSD660 is easily donned/doffed by the wearer using a diagonal watertight entry zipper across the torso and wearer's left shoulder and includes a relief zipper. Customized fit can be achieved through the standard 24 available sizes (including short & tall), adjustable internal suspenders and a waist adjustment system. Every MSD660 produced by Mustang is leak tested to ensure waterproof integrity prior to leaving our factory. All suits are 100% tested to ensure the highest level of reliability and performance.

1. MSD660 uses a single layer waterproof, breathable tri-laminate NOMEX® / GORE-TEX® shell fabric (MIL-DTL-32149). This fabric combines waterproofing, breathability and fire retardant characteristics in a single flexible layer.
2. MSD660 AF uses military grade, non-fire retardant, waterproof & breathable GORE-TEX BD6.5).
3. Rapid Repair Technology™ enables users to self-replace neck and wrist seals and repair small leaks in an hour or less.
4. NOMEX® fleece cover over neck seal to protect the user from flash fire damage to the neck seal.*
5. Reinforced molded foam knee and elbow pads that provide increased knee and elbow protection and wear resistance.*
6. Reinforced seat/thigh area.*
7. Low profile, lightweight, plastic zippers that are easier to operate and require less maintenance than typical brass metal teeth zippers.
8. Right arm air exhaust valve to vent excess trapped air out of the suit.
9. SOLAS retro reflective tape on the upper shoulders and arms for increased visibility.
10. Left arm low profile zippered shoulder pocket with dual pen holders.
11. Left and right thigh elasticized expanding cargo pockets with drainage mesh and Velcro® secured top cover entry, provide maximum storage capacity and exhibit a low-profile function when empty.
12. 2 x 4 inch Velcro® patch located on right chest for attachment of name tag.
13. Neoprene cummerbund with waist adjustment tabs allows snug waist adjustability without impeding mobility.
14. Low profile adjustable wrist over cuffs.
15. Two-point attachment adjustable and removable suspender system for an improved fit, mobility and comfort
16. Universally sized waterproof, breathable socks are permanently attached and ankle cuffs reduce entry of small debris into footwear thereby reducing wear on the socks.
17. Waterproof entry and relief zippers are covered to provide flame retardancy and help to protect the zipper teeth from damage or contamination.
